

## Data Sheet

# SonoMeter 30

## Energy Meters

## Description

MID examination certificate no.: LT-1621-MI004-020

The Danfoss SonoMeter 30 is a range of ultrasonic, compact energy meters intended for measuring energy consumption in heating and cooling applications for billing purposes. The meters are designed for remote meter read-out (AMR).

SonoMeter 30 energy meters consist of an ultrasonic flow sensor, a pair of Pt500 temperature sensors and a calculator with integrated circuits for temperature measurement, flow calculation and energy calculation.

## Features

- Available in nominal flow rates qp 0.6, 1.5, 2.5, 3.5, 6.0, 10.0 and 15.0 m<sup>3</sup>/h
- Housings with thread (G3/4 to G2) or flange (DN20 to DN50) connections
- MID approval for ultrasonic energy meter with dynamic range of 1:100 (qi:qp) in class 2
- Optional MID approved dynamic range of 1:250 in class 2 for qp 1.5, 2.5, 6.0, 10 and 15 m<sup>3</sup>/h
- Temperature range 5 - 130° C, PN 16 or 25 bar
- Short overload temperature up to 150° C
- Glycol mixtures as option (not MID certified)
- Calculator with IP65 protection class as standard
- Flow sensor with IP65 protection class as standard (IP67 for combine heating and cooling applications)
- Return or supply pipe installation, for vertical or horizontal mounting
- Battery lifetime for at least 11 years
- Low pressure loss, insensitive to dirt
- No calming sections needed before or after the flow sensor
- Remote reading via M-Bus, radio OMS 868 MHz, RS-485 Modbus RTU, pulse output or optical interface
- Two pulse inputs or outputs (selectable) as standard

Ordering

Energy meter application	Nominal flow, size and connection type	Comm. module	Energy unit	Installation	Temp. sensors length	Flow cable length <sup>1)</sup>	Operating pressure	Code no.
Heating	DN 15 / G¾B / qp 0.6 m³/h / 110 mm thread	M-Bus	kWh	Return	1.5 m	1.2 m	16 bar	187F3001
Heating	DN 15 / G¾B / qp 0.6 m³/h / 110 mm thread	OMS 868.95	kWh	Return	1.5 m	1.2 m	16 bar	187F3002

Heating / cooling	DN 50 / qp 15 m³/h / 270 mm flange	OMS 868.95	kWh	Return	2.0 m	2.5 m	25 bar	187F3107

<sup>1)</sup> Cable length between flow sensor and energy calculator.

DN15 and DN 20 meters with thread has one temperature sensor mounted in the body.  
 All above codes are battery powered meters with two 3.6 V AA cell batteries (lifetime min 11 years).  
 More standard codes are available with mains power supply 230 V AC (with external transformer and one AA cell battery back-up).

Accuracy

Measuring accuracy class 2

**Pressure loss**

**Design and function**

**Optical interface**

Optical interface is integrated into the front panel of the calculator. It is designed for data reading via M-bus protocol and parameterization of the meter using SonoMeter 30 UserConfig software and optical head OG-1-USB.

The optical interface is activated by pressing the control button and shuts automatically off 5 minutes after the last pressing button or after completing data transmission via interface.

**Wired M-Bus interface**

The energy meter has 1 slot for an additional communication module. The internal M-Bus module provides data reading possibility via M-Bus protocol:

- M-Bus protocol according to EN13757-3 standard
- 2-wire with polarity reversal protection
- Electrical isolation
- Maximum voltage 50 V DC
- Current drawn: one M-Bus load (1.5 mA)
- Primary or secondary addressing
- Baud rate 2400 bps
- Battery lifetime min. 11 years (2 AA cell)
- Fastest reading interval at battery supply: every 90 seconds (at 9600 bps, internally protected)
- Fastest reading interval at mains supply: no limits (auto at order or manual if added later)

**Radio OMS 868.95 MHz interface**

The module can provide data reading via radio module:

- Wireless M-Bus protocol according to EN13757-4
- OMS (open metering system) compatible
- T1 mode (unidirectional)
- Sending interval every 90 seconds (suitable for 'walk by' readings)

**Modbus RS-485 module**

RS-485 module is Modbus RTU protocol and a serial interface for communication with external devices.

Baud rate	1200, 2400, 4800, 9600(default), 38400, 56000, 57600, 115200 bps
Power supply	Polarity independent connection for power supply – connectors 60 and 61. Voltage 12-24 V AC/DC. Maximum power consumption 2 W max. Typical supply current 50 mA.

**2 pulse inputs or 2 pulse outputs (set up by jumpers)**

There is a connector J on the calculator plate between the temperature sensors and pulse input / output connection terminals. By means of connecting or opening the connector contacts, the pulse inputs or outputs are activated.

**Note:** On delivery the heat meter is configured with two outputs.

**Pulse inputs (not default, jumper set needed)**

Number of pulse inputs	2
Measurement units	m <sup>3</sup> (51, 52), kWh (52, 53) or MWh, GJ, GCal
Pulse value	programmable by SonoMeter 30 UserConfig Software
Min. pulse time	100 ms
Pulse type	IB by LST EN1434-2
Max. frequency of input pulses	3 Hz
Max. voltage of input pulses	3.6 V

**Pulse outputs (default, no jumper set)**

Number of pulse outputs	2
Measurement units	m <sup>3</sup> (51, 52), kWh (52, 53) or MWh, GJ, GCal,
Pulse value	according to the table below
Pulse type	open collector, permissible current up to 20 mA, voltage up to 50 V
Max. frequency of output pulses	3 Hz
Pulse duration	100 ms in normal mode, 1.6 ms in the test mode

**Energy pulse output values (V1)**

Energy units	kWh or MWh	GJ	Gcal
Pulse value of thermal energy	1 kWh/pulse	0.005 GJ/pulse	0.001 Gcal/pulse

**Volume pulse output values (V2)**

Nominal flow rate (qp), m <sup>3</sup> /h	0.6 - 6	10; 15
Pulse value, l/pulse	1	10

## Data logger

### Data logger

Following hourly, daily and monthly parameter values are recorded in energy meter memory (can be configured by SonoMeter 30 UserConfig software):

- 1..... Integrated heating energy
- 2..... Integrated cooling energy
- 3..... Integrated energy of tariff 1
- 4..... Integrated energy of tariff 2
- 5..... Integrated volume of liquid
- 6..... Integrated pulse value in pulse input 1
- 7..... Integrated pulse value in pulse input 2
- 8..... Maximum thermal power value for heating and date
- 9..... Maximum thermal power value for cooling and date
- 10.... Maximum flow rate value and date
- 11.... Maximum value of flow temperature of heat conveying liquid and date
- 12.... Maximum value of return temperature of heat conveying liquid and date
- 13.... Minimum value of flow temperature of heat conveying liquid and date
- 14.... Minimum value of return temperature of heat conveying liquid and date
- 15.... Minimum value of temperature difference and date
- 16.... Average value of flow temperature of heat conveying liquid
- 17.... Average value of return temperature of heat conveying liquid
- 18.... Operating time without an error of thermal energy calculation
- 19.... Total error code
- 20.... Time when the flow rate exceeded 1.2 q<sub>s</sub>
- 21.... Time when the flow rate was less than q<sub>i</sub>

### Data logger capacity

- up to 1480 h – for hourly records
- up to 1130 days - for daily records
- up to 36 last months - for monthly records
- Storage time of measured integrated parameters even if device is disconnected from power supply: not less than 15 years

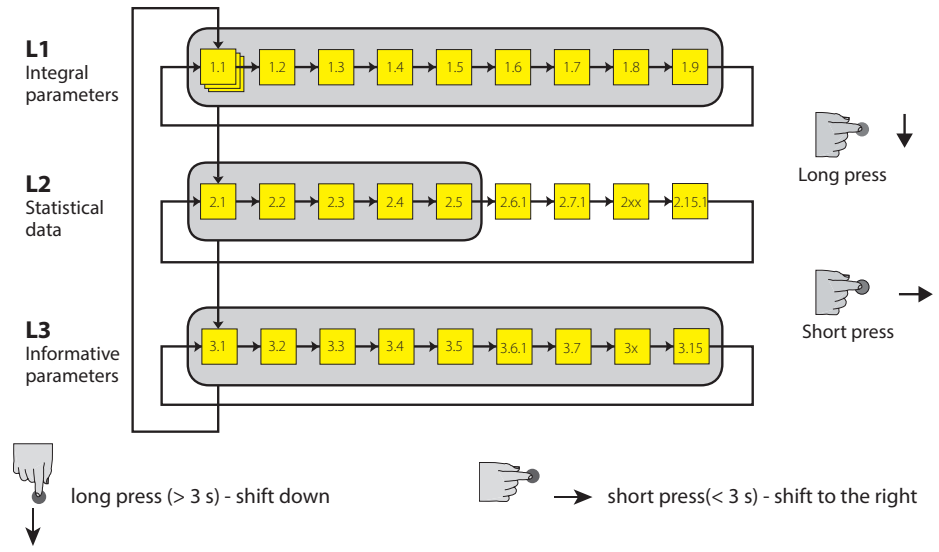

All data from archive can be read by means of the remote reading. In addition data logger records of monthly parameters can be seen on the display.

## Power supply

Power supply (one of following depending on meter configuration):

- 2 AA cell battery 3.6 V DC, 2.4 Ah (Li-SOCI<sub>2</sub>) lithium battery, life time at least 11 years
- Mains power supply 12 V AC to 36 V AC (50/60 Hz) or 12 V DC to 42 V DC:
  - The mains power supply 24V AC/DC module is mounted inside in the meter
  - Consumption is max 20 mA
  - Galvanically isolated + internal backup battery size AA cell, 3.6 V, 2.4 Ah, lithium battery (Li-SOCI<sub>2</sub>). When the external power supply is turned off, the battery life time is not less than 11 years (without data reading via a digital interface)
- Mains power supply 230 V AC (+10% / -30%) 50/60Hz:
  - The meter should be equipped with an internal power supply unit and an external transformer. The 230 V AC to 24 V AC transformer is used for connection to mains power supply 24 V AC/DC module inside the meter
  - Consumption is max 10 mA

**Menu structure**

**Mounting**

Pipe position: No limitations, but avoid position where air can be collected

Rotation in pipe axis
